

### **INCLINED** CUTTING

# THE 30° REVOLUTION

Inclined Cutting is a revolutionary, new cutting technique. With its unique 30-degree angled jaw, the Holmatro Inclined Cutter improves user comfort and maximizes working space.

#### **Improved ergonomics**

The Holmatro Inclined Cutter reduces physical strain when cutting vehicles well above or below waist level. You don't need to lift the cutter to shoulder level for a high cut or to bend over for a low cut. The inclined jaw keeps the ideal 90° angle towards the construction, required for effective cutting. Any other position will reduce cutting performance.

#### **Maximized working space**

With the Holmatro Inclined Cutter you can work more quickly and safely, thanks to 30 degrees of extra working space for your tool. It enhances patient safety and minimizes the need for repeated cutter repositioning.

#### Inclined cutter jaw

- -for more ergonomic cutting above waist height or low on the car
- -to reduce the effect of tool movement towards the patient or the ground (no unintended leverage)

### Integrated LED lighting

- new LED lighting in the carrying handle: no less than six lights with a higher light output. You can start right away, both during the day and at night, without working in your own shadow.

### Ergonomic carrying handle

- new ergonomic carrying handle design increases operator comfort in various working positions.
- -the Inclined Cutter has one that goes all-around the tool, enabling you to take full advantage of its benefits at all sides of the car.

#### NCT blade design - unmatched performance

- -pulls material towards the strongest point of the cutter
- -superior cutting performance, tested on the latest car models
- optimized cutting edge for long blade life
- saves time: only one cut for wide and deep B-pillars

### Integrated LED lighting

-new LED lighting in the carrying handle: no less than six lights with a higher light output. You can start right away, both during the day and at night, without working in your own shadow.

#### Lighter and more ergonomic than ever

- easy to carry and handle, reducing physical burden

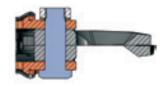

#### i-Bolt Technology

-on all inclined, NCT and GP cutters, except CU 4040 C GP

Traditional bolt construction

i-Bolt construction

-flatter design for better access in narrow spaces

Squeezes blades directly to avoid blade seperation, for a superior cutting performance.

### **GP cutters** - General Purpose

| weight, ready for use 2)         | kg | 17.4                                                                       |  |  |
| continuous operation per battery |    | 140 minutes during common vehicle extrications 280 minutes unloaded (idle) |  |  |

 $<sup>^{1)}</sup>$  EN 13204: STO = Single Tool Operation  $\mid$   $^{2)}$  including battery, hydraulic oil and coupler

#### 3-stage pump technology

-higher flow / tool speed in 2nd stage, more control when you need it in 3rd stage

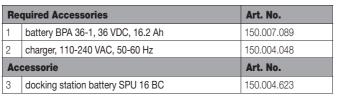

#### **Emission-free**

- ideal for powering rescue equipment in confined spaces like tunnels, trains and collapsed buildings
- healthier for rescuers and victims

#### **ECO** whisper mode

- power saving and extremely low noise level when tool is not in use

#### All weather proof

- -suitable for use at below zero temperatures, down to -20° C
- suitable for use in wet weather conditions

#### **LED** lights above the coupler

- easy to locate pump in the dark
- -facilitates coupling and uncoupling of hose in the dark

#### **LED** battery level indicator

- -indicates battery capacity while pump is in use
- -when pump is not in use, the battery capacity can be checked by pressing a button

#### Long running time

- 140 minutes during common vehicle extrications, even with the use of heavy-duty rescue tools
- -70 minutes continuous spread/cut tool use

### **Motor pumps**

#### $^{1)}$ EN 13204: STO = Single Tool Operation, MTO = Multiple Tool Operation

#### Low noise level - both models

- -according to EN ISO 11201
- -more comfortable for victim and better workplace for rescuer

72 dB

#### Low noise level

decreased burden for victims
 easy to communicate at
 rescue scene

#### **ECO-switch**

- Electronic engine speed control. In ECO setting, engine speed increases automatically to maximum speed when tool is used
- when tool is not used, engine speed reverts to nominal speed
- minimizes noise and fuel consumption

### Extremely lightweight pumps

-can be carried quickly and easily to even the most inaccessible accident locations

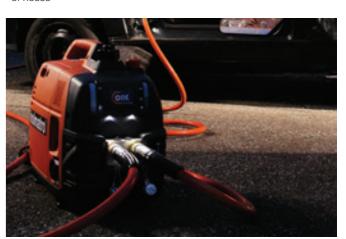

#### 3-stage pump technology - SPU 16 PC

- higher flow / tool speed in 2nd stage, more control when you need it in 3rd stage

#### Lighting above coupler(s)

 easy identification in the dark and facilitates coupling and uncoupling of hoses

<sup>2)</sup> Including hydraulic and engine oil, fuel and coupler(s)

<sup>1)</sup> MTO = Multiple Tool Operation | 2) including hydraulic and engine oil, fuel and couplers | 3) including hydraulic oil and couplers

#### 3-stage pump technology

- -much higher flow/speed in 2nd stage for quicker rescue operations
- -lower flow/speed in 3rd stage for more tool control

### Also available with electric start

- Petrol pump S-models (not in table)
- detachable operation panel (240 x 190 x 150 mm) incl. 3m. cable with connector
- including battery; automatically charges when engine runs

#### ECO mode on SR 40 PC 2 E(S) - not in table

- -for optimal reduction of noise and fuel consumption
- -less noise means less stress for victims and easier on-scene communication
- -reduced fuel consumption extends the pump's operation time

#### Hydraulic oil level indicator

-for quick and easy monitoring of oil level from the outside of the pump

 SR 40 - accessories
 Art. No.

 LED light Spider range
 590.000.343

 ECO module SR 40 PC 2 <sup>-1)</sup>
 150.182.272

#### Large hydraulic oil capacity

-enough oil to operate any two tools at the same time, including the biggest rams

#### Also available with hose reels - not in table

- 15 m (41 models)
- or 20 m (42 models) hoses, only on petrol / electric pumps with 2 connections
- with foldable handle for hose winding: saves valuable storage space in your rescue truck

#### Other choices to meet your requirements

- simultaneous operation of 2 or 4 tools
- -petrol, diesel, electric or petrol with electric start

<sup>1)</sup> to upgrade your existing SR 40 PC 2 (S) pump to an SR 40 PC 2 E(S)

#### Unmatched performance, ultimate freedom. Go to holmatro.com/evo3

#### **Self-contained**

- for optimal freedom of movement
- -rapid deployment: simply press the start button and start working

#### **Inclined cutter jaw**

- -for more ergonomic cutting above waist height or low on the car
- -to reduce the effect of tool movement towards the patient or the ground (no unintended leverage)

#### **Excellent cutting performance on new cars**

- NCT blade design: U-shaped blades pull even the widest material into the cutting recess, allowing it to be cut at the strongest point of the cutter

#### i-Bolt technology

-equipped with i-Bolt which squeezes the blades together directly (thus more tightly) for less blade separation and an improved cutting performance

Squeezes blades directly to avoid blade seperation, for a superior cutting performance.

### **Self-contained rescue tools**

### Cordless NCT cutters - Traditional

#### Unmatched performance, ultimate freedom. Go to holmatro.com/evo3

#### Effective profile on the spreading tips

- perfect grip in every situation

#### **Advanced battery technology**

-lithium-ion technology combines a long battery life with high capacity for maximum operational use.

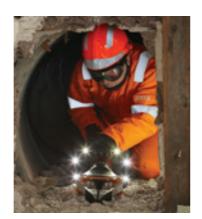

### Use in all weather conditions

- suitable for use in all weather conditions, also in the case of (extreme) precipitation and temperatures down to -20° C.

#### **Emission-free**

 no emissions, so healthier for rescuers and victims: ideal for use in confined and/ or underground spaces.

#### Self-contained with integrated 2-stage pump

- for optimal freedom of movement
- -rapid deployment: simply fold out the pump handle and start pumping

#### Pump handle foldable and rotatable

- easy carrying and storage
- can be used in any position
- -also easy to use in confined spaces

#### 360° rotatable, flat foladable carrying handle

-11 locking positions for use at almost any angle: HCT 5111 / 5117 RH

### **Various rescue tools**

| Concrete crusher     |      | CC 23       |
|----------------------|------|-------------|
| art. no.             |      | 150.012.295 |
| max. opening         | mm   | 230         |
| max. crushing force  | kN/t | 113 / 11.5  |
| shape of tip         |      | pointed     |
| weight ready for use | kg   | 19.1        |

- -heavy-duty: designed to quickly break away large, thick pieces of
- -limited dust: supports a clear view at the rescue scene
- -no vibrations: prevents risk of secondary collapse
- ideal to use in combination with mini cutter for cutting re-bar
- -more silent than use of rescue saw: only pump produces sound

A perfect combination: crushing concrete with the CC 23 and cutting re-bar with mini cutter CU 4007 C or SMC 5006

| Pipe squeezer            |      | HPS 60 AU   |

| Ram support |      | HRS 22      | HRS 22 NCT  |
|-------------|------|-------------|-------------|
| art. no.    |      | 150.181.011 | 150.003.105 |
| max. load   | kN/t | 235 / 24    | 235 / 24    |
| weight      | kg   | 7.7         | 14.9        |

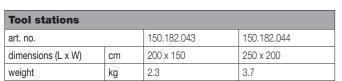

- suitable for every door sill: HRS 22 NCT for wider door sills and B-pillars of new model cars
- -various positioning bars for different ramming angles
- NCT version with teeth providing grip and profiled bars to prevent tilting of the ram

- -can be used with rams RA 4321-22 C / RA 4331-32 C
- -rescuer does not have to move under the vehicle
- can also be used to push away the steering column of a truck

- -made of recycled polyethylene, water- and oil-resistant
- virtually indestructable, longer lifespan than wood
- non-slip interlocking profile

- -durable, water- and dirt-repellent PVC coated polyester
- -foldable, so easy to carry and store

| Protection shield  |    |             |
